

## Aria e-prescribing A11 guide

### Changing dates of treatment

#### Delay or bring forward (cycle or day)

This method can only be used on or before the due date of the cycle being ordered, unless the effective date is changed on Aria to the date the cycle was due.

(To change effective date click on System admin tab at the top of the screen, choose security and then choose set effective date. *Remember to reset date after you have finished*)

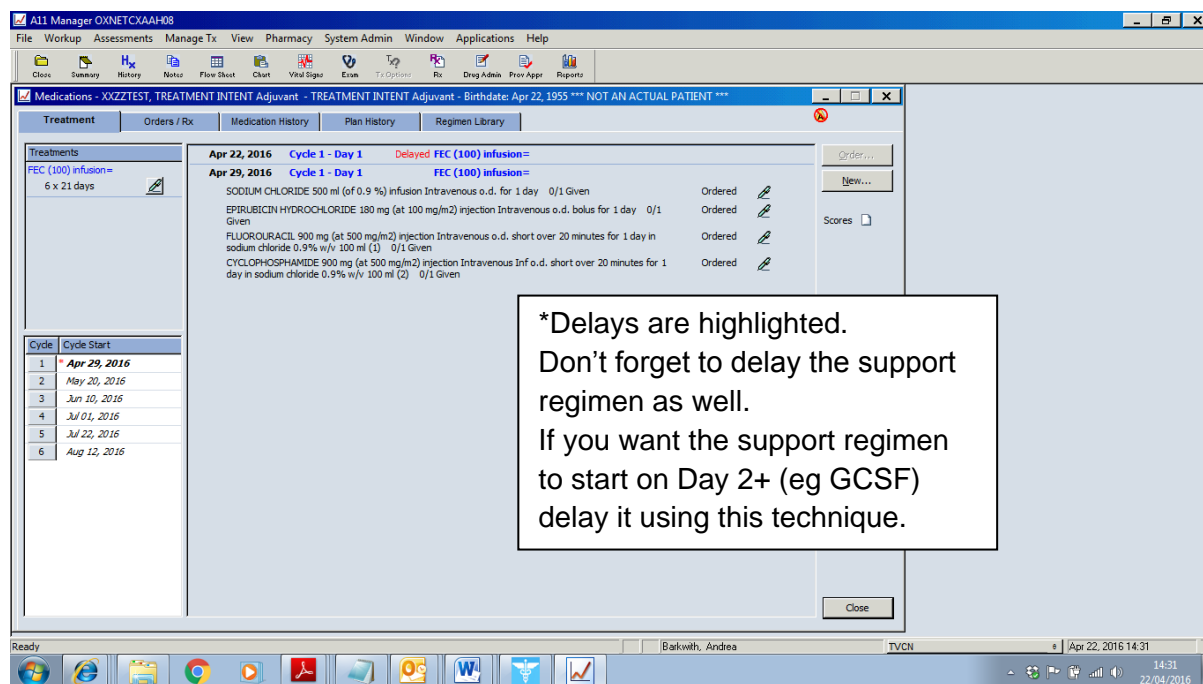

Delaying the cycle will generate a reminder.

For Next to order: Send a reminder to the scheduler in order that they delay scheduled appointments in the chemo unit.

For Next to be given: a message goes to the Nurses in the Admin window but not schedulers.

Delaying today's treatment: reissue and re-date, and so that today's visit remains in scheduling, and a new chemo unit appointment is listed to be scheduled.

You can also make a permanent NOTE to record the reasons.

Cycle Cycle Start

1	Apr 29, 2016
2	May 20, 2016
3	Jun 10, 2016
4	Jul 01, 2016
5	Jul 22, 2016
6	Aug 12, 2016

\*Delays are highlighted.  
Don't forget to delay the support regimen as well.  
If you want the support regimen to start on Day 2+ (eg GCSF) delay it using this technique.
