

Aria use to ensure SACT data completion

The monthly mandatory SACT submission is downloaded directly from Aria.

The screen shots show the fields where data must be entered on Aria to ensure it is uploaded to SACT.

If even one of the fields marked red is missing the patient will not be included in the upload at all.

The drugs also need to be recorded as administered for the patient to be uploaded to SACT.

Staging Matrix:

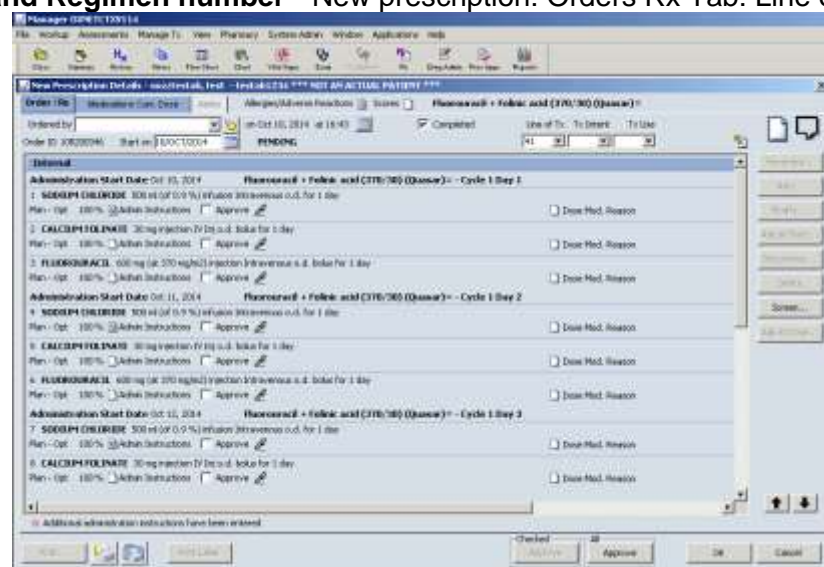

Regimen - Medications: Initiation of regimen: Select a regimen (local name will automatically map to national name once uploaded to SACT).

Any drugs prescribed, other than by picking a regimen or support regimen, will not upload to SACT.

Any regimens prescribed, will upload using the regimen name picked, even if drugs have been deleted i.e. pemetrexed maintenance needs to be prescribed rather than pemetrexed cisplatin with cisplatin deleted, which would upload pemetrexed cisplatin to SACT.

Programme number and Regimen number - New prescription: Orders Rx Tab: Line of treatment

Treatment intent - New prescription: Orders Rx Tab: Tx Intent and Tx Use

The screenshots show the 'New Prescription Details' window in the AL37 Manager software. The top screenshot displays the 'Tx Intent' tab, showing a list of medications and their dosages. The bottom screenshot displays the 'Tx Use' tab, showing a list of medications and their dosages. A dropdown menu is open over the 'Tx Use' tab, showing options: 'Adjustment', 'New/Restart', 'Not applicable (Primary)', and 'Not known/Consultation (Interim/Relapse)'.

Height and weight at start of regimen and cycle - Vital Signs:

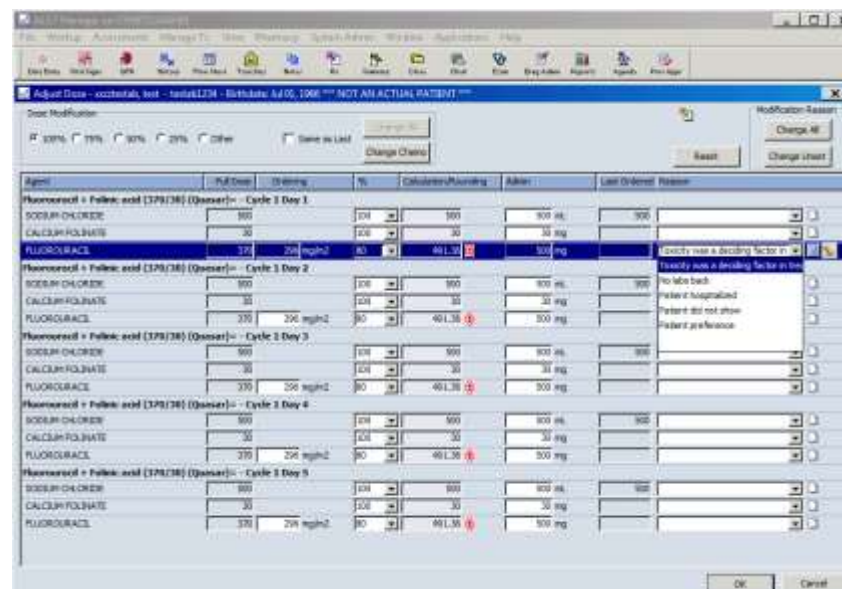

The screenshots show the 'Vital Signs' and 'Dose Calculation Management' windows in the AL37 Manager software. The top screenshot displays the 'Vital Signs' window, showing a table of vital signs. The bottom screenshot displays the 'Dose Calculation Management' window, showing a table of dose calculations.

Vital	Component	Curr. Value	Unit	Type	Date	New Value
Height	Height	165.00	cms	Actual	Jun 19, 2012	165.00
Weight	Weight	60.00	kg/body_wt	Actual	Jun 19, 2012	60.00
BSA (derived)	BSA (derived)	1.66	sq.m	Actual	Jun 19, 2012	1.66
CrCl	CrCl	74.44	ml/min	Actual	Sep 27, 2011	74.44

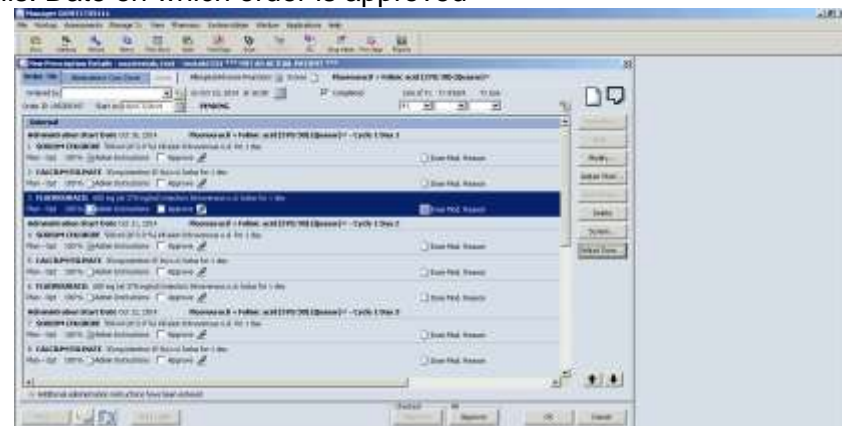

Performance status at start of regimen and start of cycle - Assessment: Patient Data Collection:
Performance status on visit on which cycle 1 / Day 1 was ordered and required prior to each subsequent cycle.

Co-morbidity adjustment - Adjust Dose: Toxicity was a deciding factor in treatment modification as reason for dose reduction

Date decision to treat
New Prescription Details: Date on which order is approved

Start date of regimen - New Prescription Details: Start on date

The screenshot shows the 'New Prescription Details' window. The 'Start on date' field is highlighted, showing a date of 20/09/2019. The window displays a list of medications and their associated instructions.

Number of cycles planned - Medications: # cycle of initiated regimen

The screenshot shows the 'Medications' window. The 'Number of cycles planned' field is highlighted, showing a value of 1. The window displays a list of medications and their associated instructions.

Cycle number - Medications: cycle ordered

The screenshot shows the 'Medications' window. The 'Cycle number' field is highlighted, showing a value of 1. The window displays a list of medications and their associated instructions.

Start date of cycle - New Prescription Details: Start on date

The screenshot shows the 'New Prescription Details' window. The 'Start on date' field is highlighted, showing a date of 20/09/2019. The window displays a list of medications and their associated instructions.

Drug name - Dose Recording: Agent Name

The screenshot shows the 'Dose Recording' window in the NHS Dose Recording software. The 'Agent Name' field is highlighted in the 'Drug Name' section. The 'Agent Name' field is currently empty, and the 'Drug Name' field is also empty. The 'Dose' field is set to '1.000000'. The 'Route' field is set to 'Oral'. The 'Frequency' field is set to 'Daily'. The 'Start Date' field is set to '2019/09/01'. The 'End Date' field is set to '2019/09/01'. The 'Status' field is set to 'Active'. The 'Comments' field is empty. The 'Add' button is visible at the bottom right.

Actual dose per administration - Dose Recording: Amount Received

The screenshot shows the 'Dose Recording' window in the NHS Dose Recording software. The 'Amount Received' field is highlighted in the 'Dose' section. The 'Amount Received' field is currently empty, and the 'Dose' field is also empty. The 'Route' field is set to 'Oral'. The 'Frequency' field is set to 'Daily'. The 'Start Date' field is set to '2019/09/01'. The 'End Date' field is set to '2019/09/01'. The 'Status' field is set to 'Active'. The 'Comments' field is empty. The 'Add' button is visible at the bottom right.

Administration route - Dose Recording: Course Description

The screenshot shows the 'Dose Recording' window in the NHS Dose Recording software. The 'Course Description' field is highlighted in the 'Course Description' section. The 'Course Description' field is currently empty, and the 'Course Description' field is also empty. The 'Route' field is set to 'Oral'. The 'Frequency' field is set to 'Daily'. The 'Start Date' field is set to '2019/09/01'. The 'End Date' field is set to '2019/09/01'. The 'Status' field is set to 'Active'. The 'Comments' field is empty. The 'Add' button is visible at the bottom right.

Regimen modification – time delay

One or more Delay Treatment actions duration of regimen.

If there is a formal delay of treatment as initiated by a delay action - Toxicity was a deciding factor in treatment modification

Outcome summary - Regimen modification - stopped early

Regimen discontinuation before the number of cycles was reached pick reason for regimen being stopped from drop down menu – required for outcome summary.

Pick 'Discontinue pending regimen dose recordings on or after..... (Do NOT pick Discontinue all (past, present and future) as this prevents drugs being administered and uploads the date when cycle 1 was initially ordered as a discontinuation date to SACT).

Outcome summary, End of treatment and Date of final treatment

On discontinuation pick reason for regimen being stopped from drop down menu.

Discontinue Pending Regimen Dose Recording Stopped from Discontinue

Discontinue Fluorouracil + Folinic acid (370/30) (Quasar) = - xxztestab, test - testab1234 - B...

Ordered by [Dropdown]

On Oct 01, 2019

Reason [Dropdown]

- Non-curative - Benefitted from non non-curative treatment
- Non-curative - Did not benefit from non-curative treatment
- Curative completed as planned
- Curative - 01 Progressive / recurrent disease
- Curative - 02 Toxicity
- Curative - 03 Death

acid (370/30) (Quasar) =).

☐ Do not discontinue any pending regimen dose recordings
☐ Discontinue pending regimen dose recordings on and after Oct 01, 2019
☐ Discontinue pending regimen dose recordings on and after Oct 02, 2019
☐ Discontinue all (past, present and future) pending regimen dose recordings

Note that pending regimen dose recordings that are not discontinued will remain in a pending state for administration and/or documentation.
