

When Giving Out a FIT Kit

Please use these specific FIT collection kits only

OR

Your role in giving out this kit:

Add Patient Name and DOB to the specimen container label
Either write this clearly or use label sticker

1

Patient Information Leaflet

→ check it is in kit pack, this will help instruct the patient in collecting the sample

2

Patient to date sample

→ when they actually produce it, show patient where to write date if possible

Talk to Patient

Please discuss these items with patients

3

Pathology Request Form

→ tell patient this must be included when returning collected sample

4

How to return sample

→ tell patient the local process for return. Encourage patient to complete ASAP (ideally, within 2 days)
